

PROCEEDINGS OF THE PHYSICAL SOCIETY

1967—VOL. 92

SUBJECT INDEX

	PAGE
Absorbing disk, non-local, Boltzmann transport equation in	165
Absorption and emission of continuous radiation by lithium ionized gas	100
Absorption, multi-photon, in monatomic gases	301
Absorption spectrum, <i>see</i> Spectrum, absorption	
Adiabatic approximation correction in polarization of closed-shell core of atomic system by outer electron	556
Air shower array, Haverah Park extensive, description of experimental facilities offered by	622
Alkali-halide-type disordered lattices, Saxon-Hutner-type theorem for spectral gaps in spectra of	977
Alkali halides, measurements of third-order elastic constants of	1090
Alkali metal atoms, empirical calculations for electron impact ionization cross sections for	871
Alkaline earth oxides, irradiated, electron spin resonance of F centres in	1055
Alkalis, differential polarizability in ground states of	857
Alkalis under pressure, resistivities and thermopowers of	460
Alloy, liquid mercury-bismuth, angular correlation of positron annihilation radiation from	195
Alloys $\text{Au}_2(\text{Mn}, \text{Al})_2$, studies of magnetic structures by neutron diffraction	713
Alloys, cobalt-nickel, distribution of effective field at ^{59}Co nuclei	117
Alloys, copper-zinc, magnetic properties of dilute solutions of transition metals in	731
Alloys, dilute, on origin of giant moments in	426
Alloys, iron-based, charge screening in	938
Alloys, liquid mercury, Knight shift of	945
Alloys, lithium-based, conduction electron spin resonance in	418
Alloys, monovalent, pseudo-atom phase shifts for	434
Aluminium monoxide, absorption spectrum and dissociation energy of	1134
Anharmonic contributions to Helmholtz free energy of simple crystal model, high-temperature limit and zero-point energy	227
Anneal, magnetic, and ferromagnetic resonance, phenomenological correlation of relaxation phenomena in	411
Antiferromagnetic resonance in chromium chrysoberyl	1040
Antiferromagnetic UO_2 , crystal-field theory for	705
Argon I transition probabilities in intermediate coupling, calculation of	896
Argon II laser, polarization in perturbed spontaneous emission spectrum of	1106
Argon, liquid, thermodynamic functions from simple geometric theory	487
Atom, hydrogen, 2 ^l -pole sum rules for (L)	842
Atom in anharmonic crystals, mean-square velocity of	998
Atomic excitation, classical adiabatic perturbation theory of	311
Atomic hydrogen, excitation of helium, nitrogen and nitric oxide by	589
Atomic interaction potentials, influence of electron distribution on	79
Atomic scattering problems, convergence of iteration-variation methods for	531
Atomic system, polarization of closed-shell core by outer electron, correction to adiabatic approximation	556
Atomic system, polarization of closed-shell core by outer electron, evaluation of polarizabilities from observed spectra	566
Atoms, Coulomb wave approximation applied to electron impact excitation and ionization of (L)	263
Atoms trapped in inert gas matrices, molecular features in spectra of	505
$\text{Au}_2(\text{Mn}, \text{Al})_2$ alloys, studies of magnetic structures by neutron diffraction	713
Autoionizing D states in helium, character of	853
Back-coupling in charge-exchange reaction, influence of (L)	839
Band effective masses for nineteen elements, calculation of	956
Band structure of hexagonal close-packed metals Sc, Ti, Yt and Zr	764
Band structures, electronic, approximate calculation of	921

	PAGE
Band system, $c^2\Sigma-x^2\Sigma$, of rhodium carbide, Franck-Condon factors and r centroids for (L)	523
Band systems of gaseous BaF, rotational analysis of (L)	518
Barium fluoride, gaseous, rotational analysis of some bands of (L)	518
Beryllium fluoride, nature of first excited electronic state	285
Bismuth, solid and liquid, angular correlation of positron annihilation radiation from	195
Boltzmann transport equation, non-local, in orifice and disk geometry	165
Broadening of ion lines, influence of elastic collisions on	889
Broadening (self-) of spectral lines in rare gases	817
Cadmium, resonance fluorescence in, study of modulation effects and lifetime measurements	497
Calcium zirconate, paramagnetic resonance spectrum of manganese in	1064
Capture, electron, from hydrogen and helium by μ^+ mesons	370
Capture of π^- mesons in oxygen and in other nuclei	377
Carbon dioxide, measurements of values of second virial coefficient of by 'piezometer' technique	1115
Carrier temperature in semiconductors, electric field dependence of	783
Charge-exchange reaction, influence of back-coupling and distortion in (L)	839
Charge-exchange scattering of negative pions by protons at 96.6 mev	609
Charge screening in ferromagnetic metal, discussion of dilute iron-based alloys	938
Charge transfer, resonant, between H^+ and $H(1s)$, calculations of total cross sections for, taking account of nuclear symmetry	866
Chemisorbed atom or molecule, electron density in metal near	776
Chromium chrysoberyl, antiferromagnetic resonance in	1040
Cobalt 59 nuclei in cobalt-nickel alloys, distribution of effective field at	117
Cobalt, group VIA transition metals containing dilute concentrations of, magnetic properties of	1083
Cobalt-doped sodium chloride crystals, study of dielectric properties of	990
Collision strengths for isoelectronic sequences $2p^3$, $2p^4$, $3p^2$ and $3p^4$, calculation of (L)	1146
Collisions, elastic, influence on broadening of ion lines	889
Collisions, $e-H_2^+$, measurement of cross section for proton production in	577
Collisions, heavy particle, evaluation of exchange matrix elements for	862
Collisions $H^+ + H(1s)$ elastic and resonant exchange, nuclear symmetry in	866
Conductivity, thermal, <i>see</i> Thermal conductivity	
Copper-zinc alloys, magnetic properties of dilute solutions of transition metals in	731
Copper-zinc, ϵ phase, dilute solutions of iron in, formation of local magnetic moment and resistivity of	739
Core, closed-shell, of atomic system, polarization by outer electron, correction to adiabatic approximation	556
Core, closed-shell, of atomic system, polarization by outer electron, evaluation of polarizabilities from observed spectra	566
Cornu's spiral, interpretation of	493
Cosmic-ray muons, direct pair production by	110
Cosmic rays, <i>see also</i> Haverah Park extensive air shower array	
Coulomb wave approximation applied to electron impact excitation and ionization of atoms (L)	263
Cross section, diffuse inelastic neutron, for impurities in Heisenberg ferromagnets (L)	845
Cross section for positronium formation by positron impact on hydrogen, calculation of	880
Cross section for proton production in $e-H_2^+$ collisions, measurement of	577
Cross section, photon attenuation, of uranium, measurements of	618
Cross sections, classical differential scattering, calculation of	551
Cross sections, electron impact ionization, for alkali metal atoms, empirical calculations for	871
Cross sections, ionization, for electron and proton impact, classical model for	875
Cross sections, momentum-transfer, of doubly charged ions in their parent gases, calculations of	94
Cross sections, <i>see also</i> Collisions, Scattering	
Crystal-field theory for antiferromagnetic UO_2	705
Crystal model, simple, anharmonic contributions to Helmholtz free energy of, high-temperature limit and zero-point energy	227
Crystal, rotating single, calculation of nuclear magnetic resonance decay by use of time-dependent Dyson expansion	1046
Crystals, anharmonic, mean-square velocity of atom in	998
Crystals, cobalt-doped sodium chloride, study of dielectric properties of	990

	PAGE
Crystals, dysprosium single, low-temperature magnetic properties of	1074
Crystals, paramagnetic, decoupling of Green's functions for spin-phonon interaction in (L) .	1143
Current density in inhomogeneous plasma, effect of second-order terms on second harmonic and sum and difference frequency components of	1122
Decay time, luminescence, for tetrahedrally co-ordinated Mn^{2+} ions in ZnS crystals, calculation for	1096
Decoupling of Green functions for spin-phonon system (L)	1143
Deuterium-helium system, experimental and theoretical studies of thermal conductivity of .	253
Dielectric properties of cobalt-doped sodium chloride crystals, study of	990
Diffraction, non-planar, influence of screen geometry in	1138
Diffraction, results obtained by Cornu's spiral	493
Difluoramine, centrifugal distortion constants for (L)	261
Dipole-dipole term in van der Waals interactions, simple method for calculation	573
Dipole polarizabilities of sodium sequence	23
Dipole properties of molecular nitrogen	291
Dipole, spin, general study of	847
Dissociation energy of aluminium monoxide	1134
Distortion constants, centrifugal, for difluoramine (L)	261
Distortion in charge-exchange reaction, influence of (L)	839
Domain structure, influence on transition temperature in uniaxial ferromagnets (L)	517
Dyson expansion, time-dependent, use for calculation of nuclear magnetic resonance decay in rotating single crystals	1046
Dysprosium single crystals, low-temperature magnetic properties of	1074
Effective mass theory, Green function approach to	758
Elastic collisions, influence on broadening of ion lines	889
Elastic constants, third-order, of potassium chloride, sodium chloride and lithium fluoride, measurement of	1090
Electric field dependence of carrier temperature in semiconductors	783
Electric field gradient calculations with one-centre expansion wave functions (L)	841
Electromagnetic and gravitational theory, analogy between, use for obtaining an analogue magnetic monopole	1
Electron capture by fast protons in helium	67
Electron capture from hydrogen and helium by μ^+ mesons	370
Electron density in metals near chemisorbed atom or molecule	776
Electron distribution, influence on atomic interaction potentials	79
Electron excitation to 4S states of helium, high-resolution measurement of corr.	268
Electron impact excitation and ionization of atoms, Coulomb wave approximation applied to (L) .	263
Electron impact excitation and single-photon counting techniques, direct determination of excited-state lifetimes by	75
Electron impact ionization cross sections, classical model for	875
Electron impact ionization cross sections for alkali metal atoms, empirical calculations for .	871
Electron-lattice interaction, effects on free-carrier magneto-optics of semiconductors	793
Electron scattering, low-energy, by atomic hydrogen, close-coupling approximation for	319
Electron scattering, low-energy, by atomic hydrogen, comparison of theory and experiment for electron-induced excitation of hydrogen to $n = 2$ level	345
Electron scattering, low-energy, by atomic hydrogen, correlation method for	336
Electron scattering, low-energy, by atomic hydrogen, effect of resonances on excitation in	351
Electron scattering, low-energy, by atomic hydrogen, photoionization of H^- in vacuum ultra-violet	365
Electron spin resonance, conduction, in lithium-based alloys	418
Electron spin resonance of F centres in irradiated ^{43}CaO and other alkali earth oxides	1055
Electronic band structures, approximate calculation of	921
Electronic state, first excited, in BeF, nature of	285
Electronic structure and optical properties of magnesium	948
Electronic wave functions in structured liquid, generalized coherent-wave approximation for (L) .	265
Electrons, collisions with H_2^+ ions, measurement of cross section for proton production in	577
Electrostatic energies of metals, calculation by plane-wise summation	434

	PAGE
Emission and absorption of continuous radiation by lithium ionized gas	100
Emission spectra, <i>see</i> Spectra, emission	
Emission spectrum, <i>see</i> Spectrum, emission	
Energies, electrostatic, of metals, calculation by plane-wise summation	434
Energy, dissociation, of aluminium monoxide	1134
Exchange coupling in ferromagnetic terbium	408
Exchange matrix elements for heavy particle collisions, evaluation of	862
Exchange scattering amplitudes, calculation of (L)	1144
Excitation, atomic, classical adiabatic perturbation theory of	311
Excitation, electron impact, and single-photon counting techniques, direct determination of excited-state lifetimes by	75
Excitation, electron-induced, of hydrogen to $n = 2$ level, comparison of theory and experiment	345
Excitation, electron, to 4S states of helium, high-resolution measurement of	corr. 268
Excitation in low-energy e^- -H scattering, effect of resonances on	351
Excitation, nuclear, of collective states, in inelastic scattering of complex nuclei	909
Excitation of forbidden lines, calculations for $2p^3$, $2p^4$, $3p^2$ and $3p^4$ isoelectronic sequences (L)	1146
Excitation of atoms by electron impact, Coulomb wave approximation applied to (L)	263
Excitation of helium, nitrogen and nitric oxide by fast protons and hydrogen atoms	589
Excited electronic state, first, in BeF, nature of	285
Expansion coefficients, high-temperature, for magnetic lattices with arbitrary interactions, calculations of	650
F centres in irradiated ^{49}CaO and other alkaline earth oxides, electron spin resonance of	1055
Faraday rotation in indium arsenide	215
Ferromagnet, Heisenberg model, Wick theorem and linked-diagram expansion for	1002
Ferromagnet, Heisenberg, thermodynamic behaviour of	1010
Ferromagnet, three-dimensional Ising, critical isotherm and critical exponent of.	150
Ferromagnetic GdCl_3 , spin-wave calculations for	665
Ferromagnetic iron, measurement of magnetization distributions associated with non- transition metal impurities in	726
Ferromagnetic metal, charge screening in, discussion of dilute iron-based alloys	938
Ferromagnetic moment in MnCO_3 , spatial distribution of	125
Ferromagnetic resonance and magnetic anneal, phenomenological correlation of relaxation phenomena in	411
Ferromagnetic resonance in lattices, use of longitudinal relaxation model to investigate effect of bottleneck in energy flow	697
Ferromagnetic terbium, exchange coupling in	408
Ferromagnetism, dilute, critical behaviour of soluble model of	136
Ferromagnets, Heisenberg, diffuse inelastic neutron cross section for impurities in (L)	845
Ferromagnets, uniaxial, influence of domain structure on transition temperature in (L)	517
Ferrous fluosilicate, hyperfine interactions in	748
Field dependence, electric, of carrier temperature in semiconductors	783
Field gradient, electric, calculations with one-centre expansion wave functions (L)	841
Fluorescence, intensity-modulated, use of frequency-modulated light in double-resonance experiment for stimulation of	1070
Fluorescence, resonance, in cadmium, study of modulation effects and lifetime measurements	497
Fourier coefficients in expansion of lattice Green function and frequency spectrum, evaluation of	987
Franck-Condon factors and r centroids for rhodium carbide $c^2\Sigma-x^2\Sigma$ band system (L)	523
Frequency spectrum of lattice, Fourier expansion method for calculation for	987
Gadolinium chloride, ferromagnetic, calculation of high-temperature expansion coefficients of	650
Gadolinium chloride, ferromagnetic, spin-wave calculations for	665
Gadolinium-yttrium alloys, spin-disorder resistivity measurements in	177
Gamma rays from positron annihilation in solid and liquid bismuth and mercury and bismuth- mercury alloy, angular correlation of	195
Garnets, rare-earth, magnetic susceptibilities of	400
Gases, monatomic, multi-photon absorption in	301
Gravitational analogues of magnetic monopoles	1
Green function decoupling and diagrams	192

Green function, decoupling of, for spin-phonon system (L)	1143
Green function, lattice, evaluation of Fourier expansion coefficients for	987
Green function, one-electron, reformulation of effective mass theory in terms of	758
Hartree-Fock energy, saddle-point character of	17
Hartree-Fock equations for excited singlet S states of helium-like ions	543
Hartree-Fock wave functions, analytical, for $1snp^1P$ and 3P states of helium isoelectronic sequence	50
Haverah Park extensive air shower array, description of experimental facilities offered by	622
Heisenberg ferromagnet, thermodynamic behaviour of	1010
Heisenberg ferromagnets, diffuse inelastic neutron cross section for impurities in (L)	845
Heisenberg model ferromagnet, Wick theorem and linked-diagram expansion for	1002
Helium atom, variational calculation of expected values of number of operators for	55
Helium, character of autoionizing D states in	853
Helium, electron capture by fast protons in	67
Helium, electron capture by μ^+ mesons from	370
Helium, high-resolution measurement of electron excitation to $4S$ states of	corr. 268
Helium-hydrogen and helium-deuterium systems, experimental and theoretical studies of thermal conductivity of	253
Helium isoelectronic sequence, analytical wave functions for $1snp^1P$ and 3P states of	50
Helium isoelectronic sequence, singlet S states of	37
Helium isoelectronic sequence, triplet S states of	539
Helium-like ions, Hartree-Fock equations for excited singlet states of*	543
Helmholtz free energy of simple crystal model, anharmonic contributions to, high-temperature limit and zero-point energy	227
Hexagonal close-packed metals Sc, Ti, Yt and Zr, band structure of	764
Hulthén-Kohn type, variational methods of	62
Hydrogen atom, differential polarizability in ground state of	857
Hydrogen atom, 2^1 -pole sum rules for (L)	842
Hydrogen, atomic, low-energy electron scattering by, close-coupling approximation for	319
Hydrogen, atomic, low-energy electron scattering by, comparison of theory and experiment for electron-induced excitation of hydrogen to $n = 2$ level	345
Hydrogen, atomic, low-energy electron scattering by, correlation method for	336
Hydrogen, atomic, low-energy electron scattering by, effect of resonances on excitation in	351
Hydrogen, atomic, low-energy electron scattering by, photoionization of H^- in vacuum ultra-violet	365
Hydrogen atoms, excitation of helium, nitrogen and nitric oxide by	589
Hydrogen atoms, ground state, and hydrogen ions, nuclear symmetry in elastic and resonant exchange collisions between	866
Hydrogen, electron capture by μ^+ mesons from	370
Hydrogen-helium system, experimental and theoretical studies of thermal conductivity of	253
Hydrogen, molecular, optical properties of	42
Hydrogen molecule, singly ionized, ground state of, variational function for	529
Hydrogen, positronium formation by positron impact on	880
Hydrogen, singly ionized molecular, collisions with electrons, measurement of cross section for proton production in	577
Hyperfine interactions in ferrous fluosilicate	748
Hyperfine structure of $2p^2P$ levels of lithium	296
Impact, electron, <i>see</i> Electron impact	
Impact, positron, <i>see</i> Positron impact	
Impact, proton, <i>see</i> Proton impact	
Impurities, first transition ion, in solids, theory of spectra of	1101
Impurities, non-transition metal, in ferromagnetic iron, measurement of magnetization distributions associated with	726
Indium arsenide, Faraday rotation in	215
Indium atoms trapped in low-temperature matrices of inert gases, spectroscopy of	830
Indium, normal and superconducting, measurements of ultrasonic attenuation in	962
Inelastic scattering of cold neutrons by methane and ammonia	912
Inelastic scattering of complex nuclei accompanied by excitation of collective states	909

	PAGE
Inert gas matrices, molecular features in spectra of atoms trapped in	505
Inert gases, spectroscopy of indium atoms trapped in low-temperature matrices of	830
Infra-red structural studies on molybdenum co-ordination compounds	833
Insulating crystals, application of transport theory of liquids to	183
Interaction potentials, atomic, influence of electron distribution on	79
Interactions, van der Waals, simple method for calculating dipole-dipole terms in	573
Ion impurities, first transition, in solids, theory of spectra of	1101
Ion lines, influence of elastic collisions on broadening of	889
Ionization cross sections, electron impact, for alkali metal atoms, empirical calculations for	871
Ionization cross sections for electron and proton impact, classical model for	875
Ionization of atoms by electron impact, Coulomb wave approximation applied to (L)	263
Ions, doubly charged, calculations of momentum-transfer cross sections and mobilities in their parent gases	94
Ions, helium-like, Hartree-Fock equations for excited singlet S states of	543
Ions, tetrahedrally co-ordinated Mn^{2+} , in ZnS crystals, calculation of luminescence decay time for	1096
Iron-based alloys, charge screening in	938
Iron, dilute solutions in ϵ Cu-Zn phase, formation of local magnetic moment and resistivity of	739
Iron, ferromagnetic, measurement of magnetization distributions associated with non-transition metal impurities in	726
Ising ferromagnet, three-dimensional, critical isotherm and critical exponents of	150
Ising system, paramagnetic scattering of neutrons from (L)	837
Isoelectronic sequence, helium, singlet S states of	37
Isoelectronic sequence, helium, triplet S states of	539
Isoelectronic sequences $2p^3$, $2p^4$, $3p^2$ and $3p^4$, calculation of collision strengths for (L)	1146
Iteration-variation methods for atomic scattering problems, convergence of	531
Knight shift of liquid mercury alloys	945
Kohn-Hulthén type, variational methods of	62
L emission spectrum of lutetium 71	826
Lanthanum magnesium nitrate, neodymium-doped, nuclear spin-lattice relaxation in (L)	520
Laser, argon II, polarization in perturbed spontaneous emission spectrum of	1106
Laser-produced plasmas, vacuum ultra-violet emission spectra of	805
Lattice Green function, evaluation of Fourier expansion coefficients for	987
Lattice-electron interaction, effects on free-carrier magneto-optics of semiconductors	793
Lattices, disordered alkali-halide-type, Saxon-Hutner-type theorem for spectral gaps in spectra of	977
Lattices, ferromagnetic resonance in, use of longitudinal relaxation model to investigate effect of bottleneck in energy flow	697
Lattices, magnetic, with arbitrary interactions, calculation of high-temperature expansion coefficients of	650
Lattices, periodic, derivation of approximate Green function by generalization of effective mass theory	758
Lifetimes, excited-state, direct determination by electron impact excitation and single-photon counting techniques	75
Liquid, structured, generalized coherent-wave approximation for electronic wave functions in (L)	265
Liquids, monatomic, thermal conductivity of	476
Liquids, transport theory of, application to insulating crystals	183
Lithium-based alloys, conduction electron spin resonance in	418
Lithium, hyperfine structure of $2p$ 2P levels of	296
Lithium ionized gas, absorption and emission of continuous radiation by	100
Low-temperature magnetic properties of dysprosium single crystals	1074
Luminescence decay time for tetrahedrally co-ordinated Mn^{2+} ions in ZnS crystals, calculation of	1096
Lutetium 71, L emission spectrum of	826

	PAGE
Magnesium, doubly ionized, tetrahedrally co-ordinated, in ZnS crystals, calculation of luminescence decay time for	1096
Magnesium, optical properties and electronic structure of	948
Magnetic anneal and ferromagnetic resonance, phenomenological correlation of relaxation phenomena in	411
Magnetic lattices with arbitrary interactions, calculation of high-temperature expansion coefficients of	650
Magnetic moment, local, formed in dilute solutions of iron in ϵ Cu-Zn phase	739
Magnetic monopoles, gravitational analogues of	1
Magnetic point groups, selection rules and antiferromagnetic phase transition in UO_2	705
Magnetic properties of dilute solutions of transition metals in Cu-Zn alloys	731
Magnetic properties, low-temperature, of dysprosium single crystals	1074
Magnetic resonance in mercury vapour induced by frequency-modulated light	1070
Magnetic structures of alloys $\text{Au}_2(\text{Mn}, \text{Al})_2$, studies by neutron diffraction	713
Magnetic susceptibilities of group VIA transition metals containing dilute concentrations of cobalt	1083
Magnetic susceptibilities of some rare-earth garnets	400
Magnetization distribution associated with non-transition metal impurities in ferromagnetic iron, measurement of	726
Magneto-optics, free-carrier, of semiconductors, effects of electron-lattice interaction on	793
Manganese carbonate, spatial distribution of ferromagnetic moment in	125
Manganese in calcium zirconate, paramagnetic resonance spectrum of	1064
Mercury alloys, liquid, Knight shift of	945
Mercury, solid and liquid, angular correlation of positron annihilation radiation from	195
Mercury vapour, magnetic resonance induced by frequency-modulated light	1070
Mesons, μ^+ , electron capture from hydrogen and helium by	370
Mesons, μ^+ , capture in oxygen and in other nuclei	377
Metal, electron density near chemisorbed atom or molecule	776
Metal, ferromagnetic, charge screening in, discussion of dilute iron-based alloys	938
Metals, calculation of electrostatic energies by plane-wise summation	434
Metals, group VIA transition, containing dilute concentrations of cobalt, magnetic properties of	1083
Metals, hexagonal close-packed Sc, Ti, Yt and Zr, band structure of	764
Metals, monovalent, pseudo-atom phase shifts for	434
Metals, transition, dilute solutions in Cu-Zn alloys, magnetic properties of	731
Mobilities of doubly charged ions in their parent gases, calculations of	94
Molecular features in spectra of atoms trapped in inert gas matrices	505
Molecular hydrogen, optical properties of	42
Molybdenum co-ordination compounds, infra-red structural studies on	833
Moment, local magnetic, formed in dilute solutions of iron in ϵ Cu-Zn phase	739
Moments, giant, in dilute alloys, on origin of	426
Mössbauer effect spectrum of ferrous fluosilicate	748
Muons in medium and low Z elements, direct pair production by	110
Neutron cross section, diffuse inelastic, for impurities in Heisenberg ferromagnets (L)	845
Neutron diffraction, application to studies of magnetic structures of alloys $\text{Au}_2(\text{Mn}, \text{Al})_2$	713
Neutron diffuse scattering technique, use in measurement of magnetization distribution associated with non-transition metal impurities in ferromagnetic iron	726
Neutron method, polarized, use in measuring scattering from ferromagnetic component of magnetic moment in MnCO_3	125
Neutron scattering from paramagnets	390
Neutrons, cold, inelastic scattering by methane and ammonia	912
Neutrons, paramagnetic scattering from Ising system (L)	837
Nitrogen, molecular, dipole properties of	291
Nuclear magnetic resonance decay in rotating single crystals, calculation by use of time-dependent Dyson expansion	1046
Nuclear spin-lattice relaxation in neodymium-doped lanthanum magnesium nitrate (L)	520
Nuclear symmetry in $\text{H}^+ + \text{H}(1s)$ elastic and resonant exchange collisions	866
Nuclei, capture of π^- mesons in	377
Nuclei, complex, inelastic scattering accompanied by excitation of collective states	909

	PAGE
Optical properties and electronic structure of magnesium	948
Optical properties of molecular hydrogen	42
Orifice and disk geometry, non-local Boltzmann transport equation in	165
Oscillator strength sum, 2 ¹ -pole for hydrogen atom (L)	842
Oscillator strengths of resonance transitions of spectral lines in rare gases	817
Oxygen, capture of π^- mesons in	377
Paramagnetic crystals, decoupling of Green's functions for spin-phonon interaction in (L)	1143
Paramagnetic resonance spectrum of manganese in calcium zirconate	1064
Paramagnetic salts, concentrated, effect of spin-phonon coupling on thermal conductivity of	1024
Paramagnetic scattering of neutrons from Ising systems (L)	837
Paramagnets, neutron scattering from	390
Particle in spherical potential, classical symmetry group of	525
Perturbation theory, classical adiabatic, of atomic excitation	311
Phase shifts, pseudo-atom, for monovalent metals and alloys	434
Phonon-spin coupling in concentrated paramagnetic salts, theory of and effect on thermal conductivity	1024
Phonon-spin coupling, thermodynamic effects of	680
Phonon-spin system, decoupling of Green's functions for (L)	1143
Photoionization of H^- in vacuum ultra-violet	365
Photon attenuation cross section of uranium, measurements of	618
Photon (multi-) absorption in monatomic gases	301
Photon (single-) counting techniques and electron impact excitation, direct determination of excited-state lifetimes by	75
Pions, positive, scattering by protons at 97.1 MeV	602
Pions, negative, charge-exchange scattering by protons at 96.6 MeV	609
Plasma, inhomogeneous, effect of second-order terms on second harmonic and sum and difference frequency components of current density in	1122
Plasmas, laser-produced, vacuum ultra-violet emission spectra	805
Polarizabilities, dipole, of sodium sequence	23
Polarizabilities, evaluation from spectra observed in polarization of closed-shell core of atomic system by outer electron	566
Polarizability, differential, in ground states of hydrogen atom and alkalis	857
Polarization in perturbed spontaneous emission spectrum of argon II laser	1106
Polarization of closed-shell core of atomic system by outer electron, correction to adiabatic approximation	556
Polarization of closed-shell core of atomic system by outer electron, evaluation of polarizabilities from observed spectra	566
Polymer rods, vibrational effects in absorption spectrum of	159
Polymer solutions, athermal, evaluation of second osmotic virial coefficient of	632
Polymerized material, statistical mechanics of	9
Positron annihilation radiation from solid and liquid bismuth and mercury and bismuth-mercury alloy, angular correlation of	195
Positron impact on hydrogen, positronium formation by	880
Positronium formation by positron impact on hydrogen	880
Potential, spherical, classical symmetry group of particle in	525
Potentials, atomic interaction, influence of electron distribution on	79
Potentials, equivalent, in solids, formal theory of	206
Praseodymium, remeasurement of $L\alpha_{1,2}$ lines of (L)	521
Pressure dependence of resistivities and thermopowers of alkalis	460
Proton impact ionization cross sections, classical model for	875
Proton production in $e-H_2^+$ collisions, measurement of cross section for	577
Protons, charge-exchange scattering of negative pions at 96.6 MeV by	609
Protons, fast, excitation of helium, nitrogen and nitric oxide by	589
Protons, fast, in helium, electron capture by	67
Protons, scattering of positive pions at 97.1 MeV by	602
Pseudo-atom phase shifts for monovalent metals and alloys	434
r centroids and Franck-Condon factors for rhodium carbide $c 2\Sigma-x 2\Sigma$ band system (L)	523
Radiation, continuous, absorption and emission by lithium ionized gas	100
Rare-earth garnets, magnetic susceptibilities of	400

PAGE		PAGE
948	Rare gas mixtures, binary, Sutherland-Wassiljewa coefficients for viscosities of	244
42	Rare gases, spectral lines in, self-broadening and oscillator strengths of resonance transitions	817
165	Reaction, charge-exchange, influence of back-coupling and distortion in (L)	839
842	Relaxation effects and thermal conductivity in system $\text{N}_2\text{O}_4 \rightleftharpoons 2\text{NO}_2$	800
817	Relaxation, nuclear spin-lattice, in neodymium-doped lanthanum magnesium nitrate (L) . .	520
377	Relaxation phenomena in ferromagnetic resonance and magnetic anneal, phenomenological correlation of	411
